

Datamatrix is a Swiss Clinical Research Organisation, founded in 2003, with unique mix of the expertise in statistical analysis and programming, clinical data management and medical communication. With more than 11 years of experience Datamatrix is a well-established and reliable alternative to top tier CROs.

OVER TIME, WE HAVE LEARNED HOW TO TAILOR OUR SERVICES
TO SPECIFIC CUSTOMER NEEDS.

Working with the full range of companies, from small start-ups to multi-national pharmaceutical corporations, we have learned how to tailor our services.

Our approach is to adapt to customers needs, customer's methodology with adequate use of agile concepts to provide high quality and cost effective services, in time and on budget.

FROM FIT-TO-PURPOSE FSP MODEL TO DATAMETRIX ADAPTIVE VALUE-BASED FSP MODEL *

Datamatrix has redefined the traditional FSP model by developing ADAPTIVE solutions that respond to our customer's needs. The success of Datamatrix FSP model is based on deep field expertise, possibility to adapt team size and work load while maintaining high quality and cost effective services.

Datamatrix ADAPTIVE VALUE-BASED FSP model provides the following advantages:

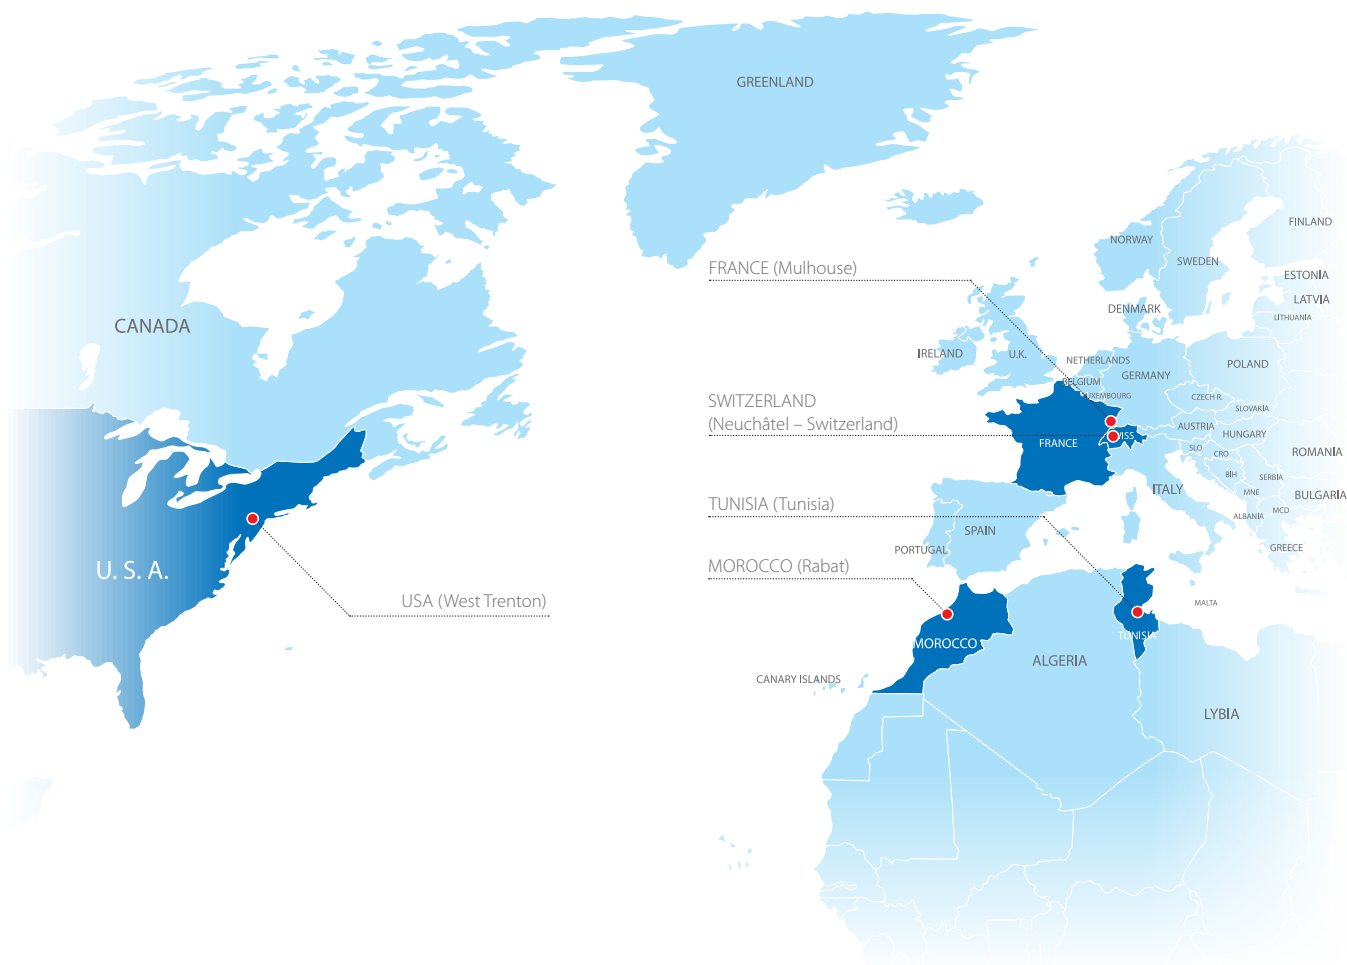

- ✓ Focused resources:
 - Specialized teams in statistical consultancy, clinical data management, SAS programming, CDISC services and medical writing

- ✓ Multiregional presence and customer support:
 - Easy face-to-face contact with project manager
 - Multi-linguistic expertise to close the language gap

- ✓ Enhanced productivity:
 - Specialized teams
 - Fully trained on customer's process and SOPs
 - Operational from the first day
 - Experts in their fields: with min 2 years of experience for to executive positions and at least 3 month for junior positions

- ✓ Accelerating recruitment timelines:
 - Only 1-3 months to provide fully operational team of 3-5 people
 - Only 3-5 months to provide fully operational team of 5+ people

- ✓ Improved cost-effectiveness due to:
 - Adaptive team size and work load
 - Reduction/No recruitment cost
 - Reduction of day-to day management costs
 - Reduction of Training cost
 - Instant dialog with project manager due to same time zone
